

Agent Acceleration in a Stable Environment

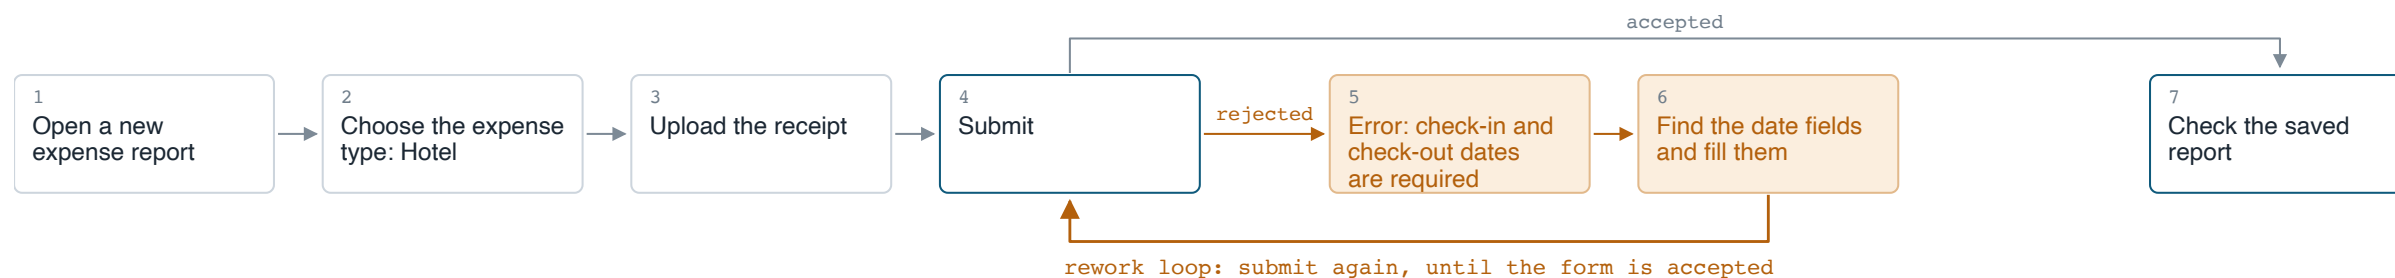

Learning from repeated tasks to make later ones faster and cheaper

October 2026

Example: a web agent that files expense reports

Our running example: a web agent files expense reports; each task is a new report in the same system. Not knowing one rule of the form, that a hotel expense needs check-in and check-out dates, sends the agent into a rework loop.

ONE HOTEL REPORT, BEFORE THE AGENT KNOWS THE RULE

WITHOUT LEARNING

The loop is paid again on every hotel report

- Its extra model calls and seconds are part of $\bar{v}(m)$, for each of the n reports

LEARNING THE RULE ONCE

The rule is learned once, at cost C_{learn} ; later reports skip the loop

IN THIS EXAMPLE

- **Environment:** the expense system, its forms, the fields each expense type requires, the actions it allows
- **Run record:** the steps above, with the error message, and the time and cost of each step

WHAT LEARNING MAY CHANGE HERE (MODEL WEIGHTS FIXED)

- **Prompt:** an instruction read on every call: fill the check-in and check-out dates before submitting a hotel expense
- **Memory:** a note read only when relevant: Hotel → check-in and check-out dates required
- **Skill or tool:** a procedure the model calls when it needs it: instructions plus a script that fills every field a hotel expense requires
- **Control code:** the harness's own logic, run whatever the model decides: check the required fields before every submit

SCOPE → this example: expense reports on a website → any workflow repeated in one software environment → websites · desktop applications · mobile apps · tool APIs

Five difficulties, grouped by the cost they affect

COST PER TASK AFTER LEARNING · $\bar{v}(m')$

1 · Fewer steps do not always save time

BEFORE

AFTER

one step

extra reading and thinking in each step

length = seconds per task · per step 20.1 → 38.7 s (calc.)

Each step got longer: judge a report by its seconds, not its steps

Drawn from WebCoach (Liu et al., 2025). Also: ReasoningBank (Ouyang et al., 2026), fewer steps, more tokens

2 · Whether a check is needed is not known in advance

Choose type: Hotel

check the form

fill dates

submit

✓

schematic

one step more, always right

skip: as last time

submit

✓ rule still holds

✗ it changed: rework

Skipping a check saves a step only while the rule still holds

Seen in: DRAFT (Qu et al., 2025), learns tool conditions by trying · SKILL.nb (Hattami et al., 2026), checks before reuse

3 · A trade-off between generalization and cost per use

generalizes ↑

cheap and general?

note in every prompt

note in memory

skill: steps + script

replayed script

schematic

cost per use →

Seen in: Metis (Dai et al., 2026), keeps both text and code · ActionEngine (Zhong et al., 2026), turns a site map into programs

COST OF LEARNING · C_{learn}

4 · Finding the cause behind an error message

Error: over the meal limit

possible causes, of different kinds, checked one by one

reasoning wrong type?

rule limit changed?

interaction wrong field?

tool amount misread?

...?

the cause may be found late, or not at all

cost of checking so far →

Each possible cause costs a check; the right one may come late, or never

Seen in: HarnessFix (Chen et al., 2026), finds the faulty step · ESPO (L. Liu et al., 2026), sorts errors first

5 · Learning and testing can cost more than they save

total cost ↑

learning and testing are paid first

no learning more testing with learning

repair after the site changes

break-even n^*

break-even, more testing

number of reports filed →

schematic

Learning pays off only if enough reports share its cost

Seen in: AI Agents That Matter (Kapoor et al., 2025), late break-even · SICA (Robeyns et al., 2025), large bill, small saving

From the expense policy to a scored report, in five steps

We break GW’s expense policy into rules, write each case a rule decides as a situation, generate documents and an answer key for it, bundle situations into expense reports, and score each report the agent files against its key.

FOLLOWED THROUGH THIS SECTION: ONE HOTEL FOLIO WITH PERSONAL CHARGES ON IT, FROM TRIP A (CHICAGO)

Provisions: the policy as 160 rules, each with its page or link

A provision is one rule of the policy, recorded with its page or link; the 149 rules an agent can act on while filing are each tested by at least one situation.

WHAT THE MANUAL SAYS · APPENDIX B, P.30–31

- **Newspapers, magazines, books** for personal use;
- **Payments to an Individual.** Payments to individuals must go through iSupply and University Payables.
- **Penalties and fees** incurred because a traveler violated airline, rail, transportation ticketing, hotel or reservation rules;
- **Special Occasion Items** for Specific Individuals (flowers, fruit, candy, balloons, etc.) unless approved in advance by a VP or Dean. The approval document must be submitted with the expense report as an additional receipt.
- **Personal articles/or personal care costs.** including but not limited to, clothing, shoes, jewelry, toiletries, prescription or over-the counter medicines, in-room movie rentals, in-room alcoholic beverages, health club fees, babysitting, recreational activities, hairdressers, etc.;
- **Personal costs** including childcare, home or lawn maintenance, etc.;
- **Pet care**, including food, kennel fees, etc.;

highlighted: the personal charges the manual excludes

RECORDED AS A PROVISION
APPB–PERSONAL · App. B p.30–31
“Clothing, shoes, jewelry, toiletries, medicines, in-room movies and alcohol, health club, babysitting, recreation, hairdressers, haircuts, personal care”

TESTED BY 14 SITUATIONS
LOD–FOLIO–PERSONAL, LOD–FOLIO–INROOM–ALCOHOL, GT–PERSONAL–DETOUR, OTH–CLOTHING, ...

READ BY THE AGENT
distilled into its rulebook, rules.md, under “Skip these — unallowable”

KIND 1 · WHERE A PROVISION COMES FROM

- 83 the manual** (rev. 2024-02-21)
[LOD–ITEMIZE](#) p.12–13: a hotel folio is itemized by night, room rate and tax; personal charges on it are left out
- 77 60 web sources:** GW pages and federal rules, for expenses outside travel
[NC–SELF–PAID](#): subscriptions, supplies, cloud services and dues paid out of pocket are filed, with a notice that GW prefers its P-Card or iBuy+

KIND 2 · CAN AN AGENT ACT ON IT WHILE FILING?

- 149 yes:** it decides how a document is filed
[APPB–PERSONAL](#), on the left
- 11 no:** it acts before or after filing
[ADVANCE](#) p.18–19: a travel advance is reconciled against the report, not filed from a receipt

Listing the 11 keeps “the whole policy is covered” honest: it means every rule an agent can act on, not only the convenient ones.

Situation: a document, its conditions and its correct handling

A situation is one case the policy decides, apart from any trip; the same document under other conditions is another situation.

Trip: a story and its situations, filed as one expense report

A trip puts a traveler’s story and the situations it contains into one folder, which the agent files as one Concur report, a few documents per turn; the answer key stays hidden from the agent.

TRIP_NOTES.TXT, AS THE AGENT READS IT

Trip notes – MOSS 2026 Chicago – Changhong Zhang (postdoctoral researcher, GW School of Engineering)

Purpose: Present a paper at MOSS 2026 (Midwest Optimization & Systems Symposium), Chicago IL, Aug 11–13 2026, and meet the symposium's benchmark working group.

Dates: Aug 10 – Aug 14, 2026 in Chicago.

Filed on: Aug 19, 2026.

Funding: Non-Grant – departmental funds; the department will supply the Oracle Alias, use a placeholder for now.

Remarks and attendees:

- I moved my return flight on Aug 14 from the morning flight to the evening flight (fare difference \$108.00) for a follow-up meeting with the organizing committee that morning; my supervisor approved.
- Aug 12 lunch, The Purple Pig: Lena Hoffmann (University of Toronto), Ana Ferreira (McGill University), me. Benchmark paper planning.

The notes decide several documents: who sat at the Purple Pig lunch, why the return flight was changed.

THE TURNS · ONE RECORDED RUN EACH

turn 1 · 6 files: the flights, the seat, the bag, the changed return, the registration and the tutorial

turn 2 · 2 files: the hotel folio and the reservation confirmation

turn 3 · 7 files: the meals

turn 4 · 11 files: ground transport and the rest

Every turn begins: never submit; read trip_notes.txt first; file what the policy allows, leave out what it does not and say why, split what must be split, and flag every judgment call with its basis.

A TRIP MUST BE CONSISTENT

one way to travel and one ticket for the trip · one hotel at a time · fuel dated the day the car is returned · no two situations at one merchant on one day

23 TRIPS

A–O, 15 travel trips, use all 169 travel situations · P–W, 8 reports outside travel or mixed, use 94 of the 98 others · 382 documents, 257 lines, 134 documents not filed, 192 flags

PER DIEM

on a foreign leg, meals are paid as a daily allowance, so a meal receipt from that leg is not filed (MEAL–INTL–PERDIEM); trip E, New York and London, claims 6 days

Scoring a filed report against its answer key

After a run we read the report back from Concur and check it against the key: trip A passed 84 of 87 checks (96.6%), its folio line passed every one, and the misses say exactly what went wrong.

THE TERMS

run: one turn, recorded step by step: the page seen, the decision, the actions, a screenshot. Trip A took 4 turns, 212 steps, \$7.22 and 24 minutes.

export: the report read back from Concur after the run.

score: checks passed ÷ checks in the key, reported by dimension.

not scored by machine: the wording of the business purpose, the Oracle alias, the mileage calculator's fields, whether an approval is attached; a person reads them in the trajectory.

ledger: each situation's record across batches: LOD-FOLIO-
PERSONAL passed 3/3.

For learning across reports this gives, per report, a success score, the steps, the dollars and the seconds; and the same situations recur from trip to trip.

MEAL-BUSINESS	p.11-12	A business meal has two or more persons, business discussed; each attendee's name and the business purpose go on the line; group functions need the announcement or invitation list; attendees may not be an approver of the report	yes	10
MEAL-TRAVEL	p.12	Travel meals are ordinary meals away from home on GW business, at actual cost	yes	6
MEAL-PERDIEM-INTL	p.12	Per diem is used only for international travel (State Department rates built into Concur); per diem days need no receipts	yes	3
MEAL-PERDIEM-CONCUR	p.12	The international meal per diem is claimed through Concur's Travel Allowance itinerary (the State Department rates are built in, pre-populated by the system); meals a host or a conference provided are marked there	yes	2
MEAL-ALCOHOL	p.12-13, App. A p.28	Alcohol is separated from the meal and charged to 52611 – Entertainment; never to a federal grant	yes	6
MEAL-GRANT-UNRESTRICTED	p.12	Alcohol and entertainment that cannot be charged to a sponsored award go to an unrestricted account	yes	5
DOC-75	p.12, p.24	Supporting documents are required for every expense over \$75; itemised receipts for meals over \$75, including meals on a hotel bill	yes	17
DOC-LEVEL3	p.13, App. D p.33	Level 3 / rich card data counts as a receipt for goods only when items are listed and the total matches; never for airfare, hotel, rental car or train	yes	3
DOC-AFFIDAVIT	p.13, p.24-25	The Missing Receipt Affidavit (in Concur) or the Acknowledgement form replaces an itemised meal receipt; missing receipts are never accepted for airfare, hotel, trains or cars	yes	2
LOD-STANDARD	p.13	A standard room, cost kept to a minimum; conference block rates booked directly are fine	yes	3
LOD-P2P	p.13	Peer-to-peer lodging (Airbnb): faculty/staff strongly discouraged; students prohibited without prior written approval of the advisor's office and Risk Management	yes	2
LOD-DEPOSIT	p.14	Deposits should be on a P-Card; deposit receipts list room nights and the rate per night; a group deposit needs the traveler names	yes	1
LOD-GUEST	p.14	Booking a hotel for a visitor: the hotel is paid in full in advance only when the rate requires prepayment; card numbers are never e-mailed	no: arranging a guest's booking is not a traveler's reimbursement	1
LOD-PREPAID	p.14	Prepaid bargain rates are risky: non-refundable and unchangeable	yes	1
LOD-ITEMIZE	p.12-13 (Documentation) + Concur	The folio is itemised by night (room rate + tax per night); personal charges on the folio are left out	yes	4

NC–SELF–PAID	owner decision 2026-09-17 (no. 4); Contract Process Guide (Procurement, 2025-04-30) p.7–8	Subscriptions, office supplies, cloud services and membership dues paid out of pocket ARE reimbursable: file the line, with a notice that GW's preferred channel is P-Card / iBuy+ and that out-of-pocket reimbursement is to be confirmed by the department (GW's order of purchasing methods does not list self-payment, and no GW page allows or forbids it)	yes	19
NC–MIXED–REPORT	owner decision 2026-09-17 (no. 3); https://ibuy.gwu.edu/expense-reporting-helpful-guidelines	Mixed reports are allowed: a non-travel receipt found in a trip folder is filed ON that report with its dedicated expense type, plus a notice that it is a non-travel expense on a travel report (GW: a mix of Domestic and No Travel may pick either travel type)	yes	3
NC–NO–TRAVEL–REPORT	owner decision 2026-09-17 (no. 3); https://ibuy.gwu.edu/expense-reporting-helpful-guidelines	A purely non-travel folder is one report whose header answers 'What type of travel expenses are you claiming?' with No Travel; no Travel Allowance itinerary	yes	39
NC–NOT–IN–CONCUR	owner decision 2026-09-17 (no. 13)	A document that is not reimbursed through a Concur expense report, or for which this account has no expense type, gets no line: the agent says 'not filed in Concur' and names the right channel (Concur Invoice non-employee reimbursement, University Payables / supplier invoice, payroll through the Provost's office, the Gift Card Order Form in Request, GW IT purchasing)	yes	26
NC–TIME–60–TRANSACTION	p.22 (new manual p.23)	Out-of-pocket claims older than 60 days from the transaction date, or from the completion of travel, as applicable, are not reimbursed; a non-travel purchase counts from its transaction date (our reading of 'as applicable'); students and guests are exempt	yes	2
NC–SALES–TAX	p.25 (new manual p.26)	GW's sales-tax exemption does not apply to purchases made with personal funds: the tax on a self-paid receipt is part of the expense (the new manual adds that P-Card holders are responsible for obtaining the exemption)	yes	14
NC–GRANT–ADMIN–COSTS	https://compliance.gwu.edu/direct-charging-administrative-costs-associated-sponsored-projects	Subscriptions, computers, general office supplies, memberships and postage are administrative costs: charged directly to a federal award only when integral to the project, allocable to it, budgeted or approved by the sponsor, and not also recovered as indirect costs	yes	4
NC–CLICK–THROUGH	Contract Process Guide (Procurement, 2025-04-30) p.33–35	Accepting click-through terms is signing a contract; faculty and staff have no authority to sign for the university without a written delegation	yes	1

Where the kind of the goods is itself arguable the defensible accounts are all accepted, with the type flag (NC-TYPE-UNDEFINED)	yes	5
NC-LAB-SUPPLIES	https://ibuy.gwu.edu/lab-supplies-equipment-0; https://compliance.gwu.edu/direct-charging-administrative-costs-associated-sponsored-projects; https://sponsoredprojects.gwu.edu/budget-cost-categories; Concur Add Expense dialog (54121 in the Supplies section)	Consumables of a laboratory — reagents, gloves, pipette tips, dry ice — are 54121-LABORATORY SUPPLIES. They are a DIRECT cost of the research, not one of the administrative costs GW's direct-charging page lists (subscriptions, computers, general office supplies, memberships, postage): on a federal award a laboratory-supply line needs no administrative-cost flag and no sponsor-approval question (NC-GRANT-ADMIN-COSTS does not reach it)	yes	2
NC-LAB-EQUIPMENT	https://controller.gwu.edu/capitalized-asset-management; Concur Add Expense dialog, Equipment section; owner decision D-079 (2026-09-20)	Furniture and equipment under \$5,000 a unit is not capitalized (NC-CAPITALIZED-5000): the Equipment section splits it in two — 52191-NON-CAPITALIZED INSTRUCTIONAL & LAB FURNITURE EQUIPMENT for what furnishes a laboratory or a classroom, 52195-OTHER NON-CAPITALIZED FURNITURE & EQUIPMENT for the rest of an office. A computer stays 52193 (NC-COMPUTER-GWIT); an office device is equipment, not a supply (54111) and not a miscellaneous office expense (52691)	yes	2
NC-STANDARDIZATION	https://compliance.gwu.edu/standardization-goods-equipment-and-services-purchasing; Contract Process Guide (Procurement, 2025-04-30) p.3, p.8	GW asks departments to buy furniture, equipment and services to the university's standards, through Procurement and its contracted suppliers, and to consult P2P before departing from them: furniture an employee bought out of pocket is filed with a needs_review flag naming the standardization policy (the page does not say the purchase is void — the flag asks, it does not refuse)	yes	1

PROVISION	PAGE OR SOURCE	THE RULE, AS RECORDED	CAN AN AGENT ACT ON IT?	SITUATIONS
NC-BINDING-ALONE	Concur Add Expense dialog, Printing/Copying section; experience (GW's manual does not mention printing, copying or binding)	An outside shop's invoice for BINDING alone — no printing on it — is 55513-BINDING, the section's own type; 55511-NON-GW PRINTING/REPRODUCTION is printing and reproduction and 52661-OFFICE COPYING - NOT GWU is copying (NC-PRINTING covers an invoice that mixes them)	yes	1
NC-AV-LIBRARY-SERVICES	Concur Add Expense dialog, Books/Subscriptions section; experience	A library's SERVICE — document delivery, a copyright-cleared article, digitisation, an audiovisual service — is 52716-AUDIOVISUAL/LIBRARY SERVICES, next to 52221-SUBSCRIPTIONS/PERIODICALS and 52231-BOOKS in the same section: a service bought item by item is neither a subscription (nothing recurs) nor a book	yes	1
NC-FLEET-FUEL	https://transportation.gwu.edu/fleet; https://transportation.gwu.edu/fleet-rental; App. B p.30; Concur Add Expense dialog (54511 is the Vehicle Expense section's only type)	Fuel an employee paid for a GW FLEET vehicle is filed under 54511-FUEL-GASOLINE AND OIL, with a needs_review flag: Transportation and Logistics settles a fleet rental's final costs 'by an interdepartmental assessment via a journal entry' and publishes nothing about fuel, so whether the fill-up belongs in that charge is to be confirmed. App. B's unallowable fuel is the fuel of a PERSONAL car, which mileage already pays for (GT-GAS-PERSONAL); a rental car's fuel on a trip stays with the trip's ground transportation	yes	1

E4 · Terms

TERM	MEANING	EXAMPLE
policy	the rules the reports must follow: GW's travel and business expense manual, GW web pages and federal rules	manual App. B p.30–31
provision	one rule of the policy, recorded with its page or link; actionable if it decides how a document is filed	APPB-PERSONAL
situation	one case the policy decides, apart from any trip: a kind of document, its conditions, the correct handling and its basis	LOD-FOLIO-PERSONAL
conditions (scope)	where a situation applies: the kind of city, the traveler, the funding	LOD-FOLIO-INTERNET-GRANT: on a federal grant
family	the kind of expense a situation is about; 10 in travel, 11 outside it	lodging
handling	what must become of a document: file · file + flag · separate out · file part · not filed	file part
judgment call	a situation whose answer is more than copying the receipt	MEAL-BUSINESS-ALCOHOL
form work (difficulty)	how much filling the correct entry takes: simple or complex	complex: the nightly itemization
trap	a deliberate contradiction or duplicate among the documents	AIR-WIFI-OTHER-CARRIER
basis	what an answer rests on: the manual or a GW rule, our decision, a source we looked up, experience, one of our receipts	AIR-COMPANION: manual p.25
instance	one generated copy of a situation: one to three documents and their answer key	Hyatt Regency Chicago folio
answer key	what a correct report contains: lines, flags, documents left out, totals that must not appear, summary mentions	amount 1120.60; unreduced total 1182.59
expense line	one entry of a Concur report: account, amount, date, vendor, currency and the fields its account requires	53104 US lodging, 1,120.60
flag	a note the agent leaves for a person to decide before submitting; in non-travel data either a notice or needs review	the alcohol split of a business lunch
itemization	a lodging line broken down night by night, room rate and tax	four nights, 08-10 to 08-13
not in Concur	a real expense that goes through another channel, so it is not filed	a \$6,450 workstation: fixed assets
per diem	on a foreign leg, meals paid as a daily allowance instead of from receipts	trip E, London
trip	a traveler's story and its situations in one folder: one Concur report	trip A, MOSS 2026 Chicago
trip notes	the traveler's own notes in the folder: purpose, dates, funding, remarks and attendees	trip_notes.txt
turn	one instruction to the agent with a few of the trip's documents; a trip takes two to six	turn 2: the folio and the confirmation
run	one turn's execution, recorded step by step: page seen, decision, actions, screenshot	trip A: 4 runs, 212 steps
export	the report read back from Concur after a run	actual.json
score	checks passed ÷ checks in the answer key, reported by dimension	trip A: 84 of 87, 96.6%
ledger	each situation's record across batches: tested how often, passed how often	LOD-FOLIO-PERSONAL: 3/3
